

Customer chemical service information

1. Agree to per-wash your hair as direct if required.
2. Shampooing your hair after a colour service with products suitable for coloured hair.
3. If having red or copper tones understanding that these will fade quicker if exposed to sunlight, chlorine or unsuitable shampoos that loosen colour build up.
4. Understanding that any chemical service will compromise the condition of the hair.
5. Understanding that a cut / trim is always recommended after a colour service to remove any dry ends.
6. Agreeing to a skin test . Details on request
7. Fashion colours -
 - A.To keep the colour vibrant these may need to be reapplied every 3-8 weeks in some cases. But may last much longer or actually change colour / tone as time goes on in other cases .
For example a purple may become blue after time.
 - B. Always wash your hair in cold, cool or lukewarm water, never In hot water.
 - C. Only wash your hair once a week for longer lasting results.
 - D. Be aware that there will be a colour residue so it is recommended to cover your pillowcase at night and use old Towels when washing your hair.
 - E. Use shampoos for coloured hair only
 - F. A conditioner will protect the colour and keep the shine for Longer.
 - G.The longevity of these colours can not be guaranteed.

I have read and understand all the advice and recommendations given to me here and will keep a copy to refer too in the future.
